## **DRONE THINK DO GO VERTICAL FARMING** in collaboration with

### **The African Association for Vertical Farming (AAVF)**

Smart, Precision or Vertical Farming and the future of agriculture play a significant role in the vision of a Fourth Industrial Revolution (4IR) in Africa.

Since Technology and Agriculture are rapidly becoming the norm within the African space, bringing in more and more tech savvy youth developing Agriculture applications, drone technologies and other AI mechanisms. The Youth of Africa are pushing agriculture into the Next Industrial Revolution. "DIGITAL".

The African Association for Vertical Farming (AAVF) brings in Modern Agriculture Strategies, Trainings and Capacity building for the Youth of Africa. This means creating awareness on food production, working on food systems using Technology in Agriculture to overcome the constant dialogues on hunger and poverty in the continent.

The AAVF plays a CATALYTIC role between the Governments and the Youths of Africa, not only to bring in Smart Food Systems that are "Made in Africa", but to open the door, to Demonstrate /Illustrate other Technologies that will create job opportunities allowing the Youth of Africa to be part of the Global Digital Economy.

The AAVF is honored to invite DRONE THINK DO as their strategic Partner to support the capacity building strategy on AI, Drone mechanism, building and strategies to be used in Africa's agriculture space.

TEXT DRONETHINK DO:

**AFRICAN ASSOCIATION FOR VERTICAL FARMING**

Vertical Farming has a chance to be introduced, taught and practiced in AFRICA to offer a range of solutions that go from Food Security, Use of Drones in Agriculture, Innovations around Solar, Grow Lights, Sensor Development & Monitoring.

**FROM DRY UNPROTECTED LAND TO HEALTHY CONTROLLED ENVIRONMENTAL AGRICULTURE.**
